North Carolina Heat Report May 1 – September 30, 2018

2018 Season Summary

- * Daily maximum heat indices ranged from 75.5°F to 107.5°F (median = 92.6°F) at Raleigh-Durham International Airport (RDU)
- * 4593 emergency department visits for heat-related illness were observed
 - 73% of visits were for males, mostly aged 25-64 (Table 1)
 - Most visits were seen in hospitals in the Coastal (43%) and Piedmont (50%) regions
 - 15% of visits were seen in hospitals in the Sandhills sub-region
- * The average 2018 proportion of emergency department visits for heat-related illness (0.19%), similar to 2016 and 2017 data (Figure 2)

¹The Sandhills sub-region is comprised of the following counties from the Piedmont and Coastal regions: Bladen, Cumberland, Harnett, Hoke, Lee, Montgomery, Moore, Richmond, Robeson, and Scotland. Data begins 4/29/18. This data is pulled weekly on Tuesday and may vary from other data in the report.

<u>Table 1.</u> Emergency department visits for heat-related illness by sex and age group—North Carolina May 1 through September 30, 2018.

May 1 amough coptomics co, 2010.			
	N=4593	(%)†	
Sex			
Male	3342	(73)	
Female	1251	(27)	
Age Group (yrs)			
0-14	231	(5)	
15-18	274	(6)	
19-24	459	(10)	
25-44	1574	(34)	
45-64	1303	(28)	
65+	752	(16)	

*n may vary from weekly total visits †may not total 100

NOTE: Emergency department visit records and maximum heat indices were obtained from NC DETECT and the State Climate Office at NC State University, respectively. Heat-related illness is captured through a near real-time keyword search for 'heat,' 'hot,' 'hyperthermia,' 'heat cramp,' 'heat exhaustion,' 'heat stroke,' and 'sun stroke' in chief complaint or triage notes of emergency department records or a diagnosis code for heat-related illness. These figures present an estimate of the number of emergency department visits for heat-related illness. Please contact lauren.thie@dhhs.nc.gov for more information.

Disclaimer: The North Carolina Disease Event Tracking and Epidemiologic Collection Tool (NC DETECT) is an advanced, statewide public health surveillance system. NC DETECT is funded with federal funds by North Carolina Division of Public Health (NC DPH), Public Health Emergency Preparedness Grant (PHEP), and managed through a collaboration between NC DPH and the University of North Carolina at Chapel Hill Department of Emergency Medicine's Carolina Center for Health Informatics (UNC CCHI). The NC DETECT Data Oversight Committee does not take responsibility for the scientific validity or accuracy of methodology, results, statistical analyses, or conclusions presented. The NC DETECT Data Oversight Committee (DOC) includes representatives from the NC DPH, UNC NC DETECT Team and NC Hospital Association.
